

20' Conservatory

G-320

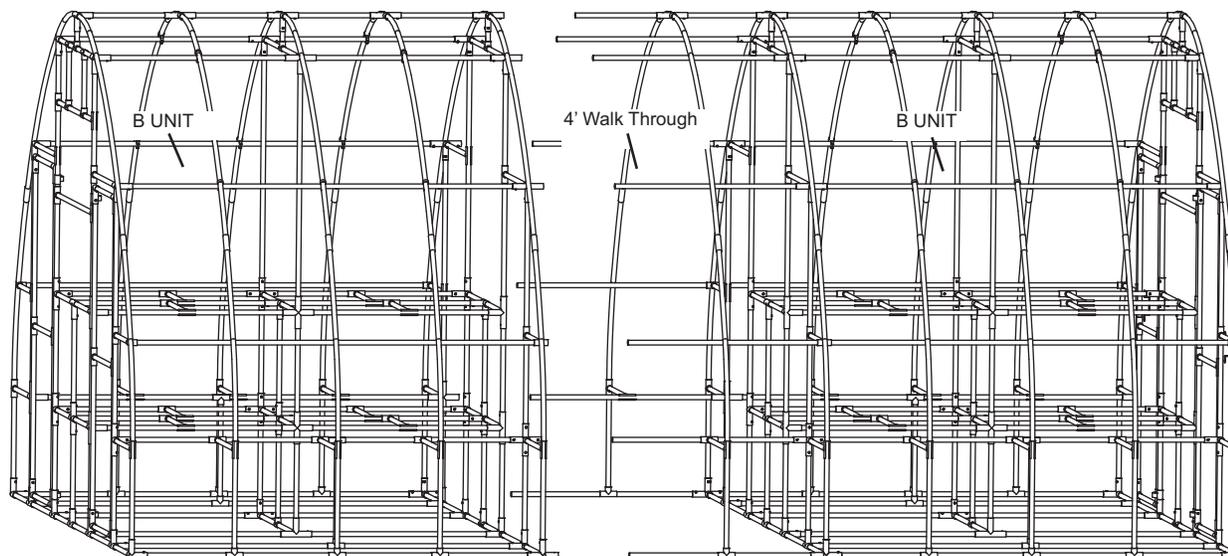

This greenhouse consists of two 16' x 8' spans joined by a 4' Walk-Through. Each 8' long section consists of double decker benches with isles on each side and a single bench frame on the side wall and two Hanging Rods. The Walk-Through has single bench frames on the outside wall and two hanging rods.

GENERAL INSTRUCTIONS

Your kit contains 2 B Units and 1 4' Walk-Through (G-304)

Following are the steps involved:

1. Construct an **16' x 8' (B UNIT)**.
2. Construct a second **16' x 8' (B Unit)**.
3. Place the two 8' x 16' on their permanent site (if you haven't already done so) with the door ends on opposite ends, spacing them so they are a little over 4' apart.
4. Construct the **4' Walk -Through** to join the two B Units together forming the approximately 20' long greenhouse frame.
5. Follow the **Conservatory Paneling and Door Assembly instructons** to attach the Solexx paneling.

ENJOY YOUR NEW GREENHOUSE!

P.S. Please share with us any ideas you have on improving our greenhouse instructions. Pictures are appreciated.
